

ATTACHMENTS FOR REMOVABLE PARTIAL DENTURES

CHRISTOPHER BORMES, MICOI

Friday, November 8, 2019

10:15 AM - 11:45 AM

Sponsor: Preat Corporation

CE: 1.5 Scientific

Didactic review of theory of case design of removable partial dentures. The most common attachment connectors will be covered, as well as indications and contraindications for various attachment systems. Technical tips, troubleshooting, and common questions will be covered.

Chris Bormes graduated from Gonzaga University prior to attending the Dental Laboratory Technology program at City College of San Francisco. Chris has earned both ICOI Fellowship and Mastership in Dental Technology, graduated from both Ticonium's and Bego's Partial Denture programs, is a candidate for CDT in Complete Dentures, wrote the PREAT Corporation Technical Manual, and has invented six different attachments. Chris has lectured both nationally and internationally and is recognized as an expert in attachments and implantology. Chris joined PREAT Corporation in 1997 and was named President in 2010.
